PERIMETER -- In this perimeter clinic the first two and a half hours Coach Mix will work on improving your ball handling as well as your individual moves. You will be introduced to the explosive moves every good offensive player needs to know from 17' to beyond the arc. These moves are from the stationary catch, to off the dribble. The last hour and a half you will be working with the post players to develop your overall skills even further. This clinic will be the most informative clinic you will attend.
